

Ananya Verma

Computer Vision Engineer

PROFESSIONAL SUMMARY

Computer Vision Engineer with experience developing image classification, object detection, and medical image analysis applications.

TECHNICAL SKILLS

- Python, C++
- OpenCV
- TensorFlow, PyTorch
- CNN, Deep Learning
- Image Processing
- YOLO
- NumPy, Matplotlib

EXPERIENCE

- Computer Vision Intern — VisionTech AI | 2025
- Developed image preprocessing pipelines.
- Trained CNN-based image classification models.
- Evaluated models using accuracy and confusion matrices.

PROJECTS

- Lung CT Image Segmentation — Developed a U-Net model for lung region segmentation using image preprocessing and augmentation.
- Object Detection System — Built an object detection application using YOLO to detect and classify multiple objects from images.

EDUCATION

B.Tech in Artificial Intelligence — 2025
